Workshop on Drug Transporters in the Lungs

School of Pharmacy and Pharmaceutical Sciences,
Trinity College Dublin, Dublin, Ireland
22nd – 23rd September 2016

INSTRUCTORS

Per Bäckman (UK)
Markus Fridén (SE)
William Couet (FR)
Carsten Ehrhardt (IE)
Ben Forbes (UK)
Mark Gumbleton (UK)
Ken-ichi Hosoya (JP)
Yukio Kato (JP)
Takeo Nakanishi (JP)
Mikihisa Takano (JP)
Tetsuya Terasaki (JP)

It is the objective of the Workshop to bring together experts from industry and academia from Japan, Ireland, the US, UK and Europe to discuss the role of drug transporters play in pulmonary drug disposition. In addition to having talks on the state of the art in the field there will be a lot of room for discussions of future activities.

An important point will be the identification of road blocks (e.g. the scarcity of clinical data) and ways around them. What questions do we need to ask to advance the field? How can we go forward making the best use of available resources? Furthermore, we will have speakers from Trinity Research and Innovation as well as from SFI, who will help to identify means of funding for future collaborations.

Session 1 – Model systems for drug transporter studies in the lungs
Session 2 – Drug transporter effects on pulmonary PK – case studies
Session 3 – Transporters as drug targets

Organiser: Dr. Carsten Ehrhardt ehrharc@tcd.ie
